

Programming Assignment 1

DUE at the starting of the class on 09/10/2007 (Monday)

The purpose of this assignment is to introduce you to beginning Java programming concepts and to get you to learn how to edit, compile, and print Java source code files, and to learn how to print the output of your Java applications and applets.

- 1. Write a Java application, using the class style, similar to the HelloPrinter.java that will print (separate lines)**
 - a. Name (First Name Last Name)**
 - b. Student ID (2144444..)**
 - c. Name of University (Bowie State University)**
 - d. Name of the Course (CTEC 396-101: Java Programming)**
 - e. Two lines of information about yourself.**

**For the hierarchy for your application you can put
Object – YourApplicationClassName**

- 2. Write a Java applet, using the class style, similar to the HelloWorld.java applet in the tutorial that will print (separate lines)**
 - a. Name (First Name Last Name)**
 - b. Student ID (2144444..)**
 - c. Name of University (Bowie State University)**
 - d. Name of the Course (CTEC 396-101: Java Programming)**
 - e. Two lines of information about yourself.**

**For the hierarchy for your applet you can put
Object - Component - Container - Panel - Applet - YourAppletClassName**

Hand in to the instructor:

- Hardcopy of the application and its output**
- Hardcopy of the applet and its output**
- Bring softcopy of java files, class files, HTML file in a folder (titled by your name).**
