Synergistic activities

Dr. Sharad Sharma currently focused on two fields that complement each other excellently: **Software Engineering (SE)** and **Virtual Reality (VR)**. His research specialization includes modeling and simulation of emergency response and decision making, evacuation scenarios, software engineering, multi-agent systems, Virtual Reality, Augmented Reality, gaming and neural network. He has developed AvatarSim, a simulation tool in Java that can simulate building evacuation, battlefield scenario and airplane evacuation scenarios. His research study investigates modeling strategies to simulate human egress behavior in emergency scenarios and represent them in a goal-finding computer application. Dr. Sharma is the Director of the Virtual Reality Laboratory at the Bowie State University. The current projects in the Virtual Reality Laboratory focus on emergency response and decision making, evacuation (multi-user subway evacuation, airplane evacuation, VR city, and university campus evacuation), game-theme based instructional modules (programming concepts), augmented reality (way finding and navigation), mobile devices (Android app for emergency response and campus safety using ARTtoolkit), virtual museum, and online virtual classroom. Recently in 2016, he has worked on a faculty research fellowship in the Human Research and Engineering Directorate (HRED) division in **Army Research Laboratory (ARL) at Aberdeen Proving Ground (APG)**, Aberdeen, Maryland. He is involved in developing new data and visualization methods for course of action planning, visualization, training, and assessment. He is also exploring socio-cultural issues in Collaborative Virtual Environments (CVE) for emergency response and decision making in dense urban environments.

Dr. Sharma has recently won the "2018 USM (University System of Maryland) **Board of Regents' Faculty Award**" for **Excellence in Scholarship and Research**. This award is given to a nominee from USM's 12 institutions, who shows evidence of exceptional scholarship and research that extends or deepens the bounds of knowledge and are recognized as innovations in the nominee's discipline. He has also won "**Outstanding Researcher of the year Award**" in college of Arts and Science at Bowie State University in year 2013 and 2011.
