EDUCATION

Stevens Institute of Technology

Hoboken, NJ

B.S. in Computer Science

Expected Graduation: May 2028

- **Coursework:** Discrete Structures, Data Structures, Algorithms, Computer Architecture and Organization, Vectors and Matrices, Introduction to Computer Science, Physics, Systems Programming, Database Management Systems, Principles of Programming Languages

EXPERIENCE

Fintech Consulting LLC

May 2026 – August 2026

Software Engineering Intern – Full Stack

New Jersey

- Worked on PULSE, a production enterprise staffing platform (React 19, TypeScript, Express/Node.js, Prisma/MySQL, Redis) used by 400+ employees, delivering features across payroll, invoicing, and reporting modules via GitLab CI/CD.
- Helped port automation workflows (onboarding notifications, timesheet distribution, benefits reminders) into PULSE with per-client message templates, per-automation enable/disable settings, and kill-switch guards to prevent duplicate sends across environments.

JobTalk.ai

September 2025 – April 2026

Part-Time Software & Growth Engineer

New Jersey

- Brought back after summer internship for a year-round part-time role, contributing across technical development and go-to-market initiatives.
- Worked on a LinkedIn Sales Navigator scraper to automate lead generation and assisted with building internal GTM tooling, data pipelines, and automations to support client acquisition.

JobTalk.ai

June 2025 – August 2025

Machine Learning Intern

New Jersey

- Worked on prompt-engineering efforts to design and refine conversational flows for a recruiting voice agent, building reusable prompt libraries and helping implement dialogue logic and automated test scripts.
- Supported client onboarding by helping develop guides and contributing to a feedback-tracking process that improved engagement and retention metrics.

Hudson Data LLC

June 2023 – August 2023

Youth IT Intern

New Jersey

- Executed 50+ hardware and software modifications, upgrades, and database updates, ensuring seamless onboarding for new employees by configuring systems, software, and access permissions.
- Diagnosed and resolved network access issues for 120+ employees over three months, improving workflow efficiency and reducing daily operational disruptions across the organization.

PROJECTS

PULSE | React 19, TypeScript, Node.js, Express, Prisma, MySQL, Redis

May 2026 – August 2026

- Contributed to a production enterprise workforce platform used by 400+ employees, covering payroll, invoicing, reporting, and automated client communications shipped via GitLab CI/CD.
- Worked on pay-cycle handling, benefit deduction logic, a Pay-Terms autofill feature, and helped port automation workflows with per-client message templates and kill-switch guards across environments.

Staffion | Node.js, Express, PostgreSQL, React, TypeScript, FastAPI, Docker

May 2026 – August 2026

- Worked on an AI-first ATS built as a monorepo of four independently-deployed services: a Node/Express + PostgreSQL hub, a Rust résumé-parsing service, a React/TypeScript VMS portal, and a Python/FastAPI contact-enrichment API.
- Integrated a FastAPI/Kvrocks enrichment service with REST endpoints, rate limiting, and OpenAPI docs; built the React UI with proper error states, and identified unauthenticated endpoints exposing candidate PII across two services.

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, SQL, JavaScript, TypeScript, R, Assembly, HTML/CSS

Frameworks: Flask, React, Node.js, spaCy, PostgreSQL, FastAPI

Developer Tools: Git, Docker, Firebase, AWS, Vercel, Plaid, Postman

Libraries: pandas, numpy, matplotlib, scikit, pytorch, OpenAI, requests
