EDUCATION

Stevens Institute of Technology; Hoboken, NJ - (Expected May 2029)

- B.S. Computer Science
- GPA 3.96/4

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Tools: Git, VS Code, IntelliJ, FFmpeg

PROJECTS

PPM to ASCII Image Converter (Python); (October 2025)

- Developed a Python program that parses PPM image files and converts pixel intensity values into ASCII character representations
- Implemented file I/O processing, 2D array manipulation, and grayscale mapping logic
- Translated RGB values into brightness-based ASCII output

Morse Code Decoder (Python); (September 2025)

- Developed a recursive algorithm to decode and encode morse sequences
- Used multiple branching possibilities and dictionary mappings to clean up possible noisy morse code

CAMPUS INVOLVEMENT

ColorStack, Stevens Institute of Technology; (October 2025 - Present)

Freshman Representative

- Advocated for first-year general body members during weekly executive meetings
- Collaborate with executive board to plan and head events to promote the career-growth of black and latinx students
- Increased first-year engagement by communicating the ColorStack initiatives to 30+ first-year students

Software Engineering Club, Stevens Institute of Technology; (November 2025 - Present)

Back-end Developer

- Designed and implemented a backend API route in JavaScript to handle user registration data
- Validated and processed form inputs to ensure secure account creation in the signup page of the SEC student portal
- Participate in weekly project meetings in order to align head developer and project manager expectations with development

COMMUNITY WORK

Iniciativa Luz a Frente (Light Ahead Initiative); Aracaju, Brazil – (July 2023 - December 2023)

Teacher, Volunteer

- Planned weekly English grammar classes for 4 students in local church
- Provided each student with food for each class

Languages: Portuguese (native), English (fluent), Spanish (intermediate), French (beginner)
