EDUCATION

Stevens Institute of Technology - GPA: 3.75

Hoboken, NJ

Major: B.S. Computer Science, AI Concentration | Minor: Quantitative Finance

Graduation: May 2027

Two-time Recipient, Leader of Distinction Award | NJSIM Foundation Scholarship Recipient

EXPERIENCE

SMBC Capital Markets

Jersey City, NJ

Software Engineering Intern - Derivative Products Group

Jun 2026 – Aug 2026

- Built and deployed a Python automation tool that queried a production database using SQL every five minutes via AutoSys and integrated with Power Automate to automatically escalate stalled trades to Microsoft Teams, replacing a manual workflow
- Developed a management-facing Power Apps dashboard tracking daily IT system health across business lines and IT domains, backed by a live SharePoint database with real-time filtering, automated status aggregation, and row-level conditional UI rendering to eliminate manual reporting workflows; presented the solution directly to senior management
- Developed a Python script integrating with internal APIs to automate payment notice alerts to hundreds of clients, eliminating manual outreach workflows

Corbin Capital Partners, L.P.

New York, NY

Summer Analyst - Portfolio Management, Research & Investment Team

Jun 2025 – Aug 2025

- Selected as 1 of 2 interns at a \$9.6B alternative investments firm specializing in multi-strategy hedge funds and opportunistic credit
- Built financial models in Excel to test assumptions and evaluate risks across pipeline opportunities in private and public credit

Headstarter

New York, NY

Software Engineering Fellow

Jul 2024 – Sep 2024

- Built a pantry tracker web application using Next.js, React, and Firebase, automating inventory tracking and eliminating manual data entry through real-time database sync

PROJECTS

Lumen Labs | Next.js, React, Supabase, PostgreSQL, Gemini API, Vector Embeddings, Figma

- Built an AI-powered career platform for PhD students, developing the user profile system with dynamic major selection sourced from 114 academic programs in Supabase, enabling the Gemini-powered career assistant to generate personalized recommendations based on each student's degree, research interests, and skills
- Designed and built the BLS job outlook engine, mapping AI-generated career titles to 300+ keywords across 80+ SOC occupation codes to validate recommendations using real 10-year growth projections, annual openings, and employment forecasts
- Led product branding and UI/UX design using Figma and Adobe Illustrator, establishing a cohesive visual identity across the platform; advanced to semi-finals of the Ansary Entrepreneurship Competition and presented at the Stevens Innovation Expo

Hospital Rating Prediction | Python, Scikit-learn, Pandas, Logistic Regression, Random Forest, Naive Bayes

- Built a binary classification system predicting U.S. hospital quality ratings using a CMS dataset of 4,812 hospitals, preprocessing 28 features by removing 1,245 incomplete records, encoding 7 national comparison metrics as ordinal categories, and engineering a binary target variable to produce 3,567 usable records
- Trained and evaluated four supervised models including Logistic Regression, Random Forest, C5.0 Decision Tree, and Naive Bayes, achieving 87.5% top accuracy and identifying patient experience and readmission as the strongest predictors through permutation importance and feature coefficient analysis

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Stevens Institute of Technology

Hoboken, NJ

Student Tour Guide and Ambassador

May 2024 – Present

- Lead 40+ campus tours for groups of 20–40, highlighting academic programs, campus resources, and student life
- Serve as a panelist at 10+ prospective student events, sharing experiences and building meaningful connections

Others: Commuter Student Union (VP), EmpowerHer Club (Treasurer), Badminton Club, Gear & Triangle Honor Society

OTHER SKILLS & INTERESTS

Computer: MS Power Automate & Power Apps, Excel, Bloomberg Terminal, Python, SQL, C++, Java, OCaml, Bash

Organizations: Girls Who Invest SIP Scholar (Wharton), SEO Tech, Scholars of Finance, Society of Women Engineers
