- Provide fast, accurate service and operate cash register for daily transactions.
- Maintain store cleanliness and ensure compliance with health regulations.

PROJECTS

NYC Payroll Database Website

September 2025 – December 2025

Developed a database-driven website that allowed users to search, view, and organize NYC payroll-related information. Designed and implemented structured database queries to retrieve and display relevant records efficiently. Applied database management concepts to store, filter, and manage large sets of public-sector employment data.

Domino's Pizza Coupon Finder

December 2024 – Present

Developed an interactive ordering system that displays menu items, calculates order totals, and identifies the best applicable coupon based on user selections. Implemented a pricing engine to evaluate combinations of items and optimize cost efficiency. Designed for clarity, accuracy, and an intuitive user experience through structured user prompts and itemized summaries.
