WORK EXPERIENCE

Woodland Park, NJ

June 2025 - Ongoing

IT Integrations Intern, St. Joseph's Health

- Developed a fully featured backend database and front-end webpage using MongoDB and JS to save, organize, track, and filter error reports on patient updates, streamlining system debugging for the IT team.
 - Manage user access, permissions, and security in compliance with HIPAA and organizational policies in the Infinitt Vendor Neutral Archive System and the Nuance Voice Recognition system.
 - Provided technical support to clinicians and imaging staff
 - Maintaining the Health Professional file in the billing and registration system – Soarian Financials
-

PROJECTS

January 2026 - March 2026 (Maintenance Ongoing)

Website: Stage Select

- Designed, developed, and deployed a full-stack web application that lets users predict nominees and winners for video game award shows, integrating IGDB data across 11,000+ eligible games and ranking users on a points-based leaderboard.
- Implemented key features like user authentication with email verification and 2FA, community discussion with likes and comments, user follows and profiles, and an admin dashboard for managing award shows, categories, eligibility, and results.
- Optimized page performance by deferring large data loads via AJAX and deployed the site to a DigitalOcean VPS behind Nginx and Cloudflare with automated nightly background jobs to keep game data and eligibility in sync.

Stevens Institute of Technology, Hoboken, NJ

November 2024, April 2026, April 2026

Game Jam Game: Game Development Club

- Designed, developed, and tested three fully functional video games in the Unity Game Engine, each within a one-week timeframe, applying strong time-management and organizational skills.
 - Implemented key features including user input systems, scene management, dialogue mechanics, and audiovisual elements using C#.
-
