Education

Stevens Institute of Technology – B.E. in Computer Engineering, Minor in Finance Expected May 2027
Relevant Coursework: Data Structures & Algorithms, Microprocessor Systems, Image Processing, Probability & Statistics, Financial Statement Analysis

Honors & Awards

Dean's List, Stevens Institute of Technology Spring 2026 ↗

Skills

Languages: Java, Python, JavaScript, C++, SQL, Swift, HTML/CSS
Frameworks & Libraries: React, React Native, Node.js, Express, Expo
Tools & Platforms: Git, AWS, Azure OpenAI, MongoDB, Android Studio, IntelliJ, Arduino

Experience

Software Engineering Intern, Carely Health – Texas, USA (Remote) Jan 2026 – Aug 2026
- Built clinician-facing AI applications in React Native and Node.js, serving 300+ users across 24 facilities
- Designed a call-summarization pipeline turning patient conversations into structured clinical notes, cutting documentation time by 70%
- Built a multilingual voice assistant (speech-to-text + LLM) across 22 languages with risk-detection alerts cutting escalation time from 10 to 2 min

Teaching Assistant – ENGR 116 (C++), Stevens Institute of Technology – Hoboken, NJ Sept 2024 – Dec 2025
- Primary instructor for recitation across 2 classes of 100+ students; raised average scores from 82% to 95% with from-scratch materials
- Recruited the most students of any TA into the Launchpad incubator; mentees won hackathons and secured internships

Research Assistant, Stevens School of Business – Hoboken, NJ Oct 2025 – Dec 2025
- Built an AI pipeline extracting and categorizing Fortune 500 DEI disclosures from 10-K filings, cutting manual review time by 60%
- Designed a framework evaluating corporate inclusive-leadership metrics for Prof. Wei Zheng's research

Technical Operations Intern – Finance Systems & Data, Avenues Integrated LLC – Muscat, Oman June 2025 – July 2025
- Built Excel inventory-reconciliation models, automated validation workflows, and Tally Prime summaries, reducing accounting inconsistencies

Network Engineering Intern, Oman Telecommunication Co. (Omantel) – Muscat, Oman June 2024 – July 2024
- Configured and troubleshot enterprise ISDN PRI and VoIP systems for business clients
- Diagnosed fiber faults via OTDR with fusion splicing; maintained OLT/ODF infrastructure under SLA-driven provisioning

Projects

DuckSyncs / Calendar Copilot | Azure OpenAI, Node.js, Express, PDF Parsing GitHub ↗
- Built an AI calendar assistant using Azure OpenAI that parses syllabus PDFs and Canvas data into structured assignments, exams, and deadlines
- Reached the final round of the Microsoft-sponsored Stevens Quackathon as the only undergraduate team finalist

DAWA Doctor Portal | React, MongoDB, JavaScript GitHub ↗
- Built a doctor-facing chat interface for a post-operative care platform with MongoDB-backed persistent patient conversation history
- Won 1st Place at the Stevens Launchpad Hackathon

NEGATIV | React Native, Expo, WebView, HTML5 Canvas GitHub ↗
- Built a React Native app converting film negatives into positive images via an on-device HTML5 Canvas pipeline (inversion, white balance, contrast)
- Added camera capture, gallery import, film presets, before-and-after comparison, and save-to-gallery

Networking & VPN Infrastructure | Proxmox, OPNsense, WireGuard, VLANs, DNS GitHub ↗
- Deployed a Proxmox-based home network with OPNsense routing, firewall rules, VLAN segmentation, and DNS
- Configured WireGuard VPN for remote access; troubleshot live routing, DNS, and firewall issues in production

Leadership & Activities

Launchpad Program, Stevens – Startup incubator participant **Treasurer,** Commuter Student Union – CPR Certified
