EDUCATION

Stevens Institute of Technology, Hoboken, NJ

Expected May 2027

Bachelor of Science in Computer Science, Minor in Cybersecurity

GPA: 3.71

Awards: Edwin A. Stevens Scholarship, Dean's List, Upsilon Pi Epsilon Honors Society

Coursework: Data Structures, Discrete Structures, Algorithms, Computer Architecture, Web Development, Deep Learning, Operating Systems, Database Management, Foundations of Machine Learning

WORK EXPERIENCE

Crewfare, Warren, NJ | Software Engineer Intern

Summer 2026

- Contributed to the development of Launchpad, a Crewfare product, as part of a software engineering team, working across both frontend and backend systems.
- Implemented features and fixes from detailed development tickets, following the full workflow of understanding requirements, developing solutions, and incorporating code review feedback.
- Strengthened software engineering skills by applying clean coding practices, debugging techniques, version control, testing, and collaborative code review in a professional development environment.

SUNFLOW, Edison, NJ | Assistant Warehouse Manager

Summer 2025

- Managed a team of 5-8 clerks supporting daily fulfillment operations of ~\$100K in weekly sales, ensuring timely and accurate order processing from label creation to delivery.
- Reconfigured Shopify to improve operational efficiency and prevent ~\$4K in potential weekly errors caused by premature label printing.
- Conducted quality control of returns (averaging 7% daily), ensuring thorough inspection and escalating only complex cases to management.

JLS Electric, Oldwick, NJ | Apprentice Electrician

Summer 2024

- Supported precise installation of snow melt cables beneath the pavement across multiple large, curved pathways with companion light fixtures in a large-scale construction project.
 - Collaborated with a team of 8 experienced electricians to interpret schematics, splice wires, and bend PVC conduit, ensuring accurate and efficient electrical installations.
 - Inventoried storage containers weekly to track materials, improve access, and optimize efficiency.
-

PROJECTS

Stevens Institute of Technology – Hoboken, NJ

September 2025 - December 2025

HealthRadar NJ

- Collaborated in a group of 4 to build HealthRadar NJ, a web app for searching NJ healthcare facilities, verifying licenses, and locating emergency care.
- Added smart filters, analytics dashboards, reviews, and bilingual accessibility.
- Designed for 50-state scalability with an interactive map and API revenue models.

Stevens Institute of Technology – Hoboken, NJ

November 2024

CheddarCore CPU

- Designed, de-bugged, and finalized a fully operational CPU within 4 hours using Logisim.
 - Programmed the CPU to perform basic arithmetic and built a C++ tool to convert user-friendly instructions into a format the CPU could process.
 - Composed SOP to facilitate guided use by educators and parents to enable smooth child interaction.
-

SKILLS

Software: Visual Studio Code, Cursor, Logisim, MS Office, Unity, Shopify, Toast

Programming: Python, C#, C++, C, Java, JavaScript, ARM64

Languages: Spanish (Intermediate)

Interests: Video Games, Powerlifting, Golf
